Tech skills

Full-Stack React/Node.js Developer

Ievhen Pavlovskyi

There were no projects for sale. I devoted a lot of time to self-study. Fixed bugs of some already working sites. Installed and configured several online stores by using CMS. I set up my forum on the local network of the micro-district, practiced on it in PHP, SQL, FTP, the discipline of roles and access rights, etc. More practice in VB programming. For over 10 years I have been using my own MySQL database based MS Access application for my micro trade business. All this time I have been practicing VBA programming, adding functionality and making various changes. In 2015 I've been finished the offline courses 'JavaScript' and 'Programming in PHP'. Then in 2020 I started the Full-Stack Developer online courses (where I still studying).

Projects

WebStudio

[HTML5, CSS3]

Hell EN
АДСКИЙ АНГЛИЙСКИЙ

[SCSS, HTML5, JavaScript]
