Ievhen Pavlovskyi

Full-Stack React/Node.js Developer

I'm right after finishing the courses. Looking for a place where I can, not only consolidate the passed material, but also gain new knowledge.

I have no bad habits. Very punctual. I love tasks where you need to think. There was a deputy headman at the university, and a team leader several times on the courses while studying.

I'm considering different proposals. It is preferable to work remotely with deadlines, so that I can manage my time and build a schedule.

Below are my projects. Call me, I'll be glad to meet you.

Projects

WebStudio
https://sepaev.github.io/web-studio/
HTML5, CSS3

Hell EN АДСКИЙ АНГЛИЙСКИЙ
https://sepaev.github.io/reacteam-project/
